Courses with low registration will be cancelled one week prior to the session.

For more information, contact ces@albertahealthservices.ca or 403-955-7420

In this session participants will learn how the brain is affected in people with autism and about ongoing research studies at the Alberta Children's Hospital.

Level I: This session presents an overview of how the brain is affected in people with autism, and would best meet the needs of families and/or professionals with little to no knowledge of, or experience, with this topic.

This session is presented by the Community Education Service of the Child and Adolescent Addictions and Mental Health Portfolio (CAAMHP) of Alberta Health Services in partnership with [Calgary Quest School](#), [University of Calgary](#) and [Alberta Children's Hospital Research Institute](#)
